

Our AI Charter

Bring on the Future

We are committed to embracing the future through innovative technologies. One of our core values, *Bring on the Future*, drives us to integrate artificial intelligence (AI) into our firm's operations to benefit our clients and people.

Responsible use is paramount in our approach to AI. We support open and ongoing discussions about the use of AI technologies and how they are integrated into the legal services we provide.

We intend to use the following principles to guide our approach:

- 1. Trust:** Assess AI before we use it. Security, confidentiality and safety are fundamental.

- 2. Transparency:** Be transparent around our use of AI. Client insights will help shape our approach and inform our use of AI technologies.

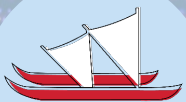

- 3. Responsibility:** Direct the use of AI and remain responsible and accountable for work generated through AI.

- 4. Ethics:** Use AI in alignment with our legal, ethical and regulatory obligations. We will adapt and respond as this technology evolves.

Key contacts

If you have any questions, or if you would like to learn more about our approach to using AI, please get in touch.
